

Cool off with a Freezie!

A student from GMS is going to Nicaragua to re-build a school in July. This school was destroyed during an earthquake last year, forcing the children to learn in a makeshift structure. This GMS student will be travelling with a group that has called themselves, “Little Bricks”. Little Bricks is representative of how each small donation will add together to form a school, each brick fitting together to create a safe space to learn. She needs our support! Money is needed to build the school and buy supplies for the kids to go to school. Did you know that only \$5 will provide one student with the supplies they need for a whole year?

For the month of June, on the last day of each week. Freezies will be sold during the lunch hour. Freezies will be sold on:

June 2, 8, 16, and 23

Freezies – \$1

If you would like to donate to the Little Brick’s group please follow the link where you will receive a tax donation receipt for any amount given! Also if you are interested in such an experience there is still space available on this trip!
